

H.2015 - Resolve To Establish A Commission To Study The Health Impacts From Land Based Wind Turbines

June 7, 2019

Senator,

I urge you to favorably report H. 2015 out of committee for a vote. My family and I have been adversely affected by a wind turbine for the last 7 years and have been unsuccessful in getting any relief from it's affects. Several other of my neighbors have also been affected by this wind turbine and are equally as anxious to get relief and to have our situation exposed and studied. I have testified before, at the Statehouse, in support of a prior bill that would study the effects of land based wind turbines and was deeply disappointed when that bill didn't come to a vote. It is very important to health and well being of many people in many communities that this bill be enacted so that we the affected will have the opportunity to prove our contentions of wind turbine ill effects.

Please report favorably on H. 2015 and have this bill go to vote.

Sincerely,

David Dardi
